Timber • Aluminium • Security • Recreational • Hardware • Automation

Mission Statement

“Heritage Gates is committed to providing its customers with superior products that will enhance the value, safety and security to their property whilst adding eminent value!”

THE ALUMINIUM SELECTION

WELCOME TO HERITAGE ALUMINIUM GATES & FENCES

Welcome to the Heritage Gates Aluminium range of gates and fences. Manufactured from aluminium or a combination of an aluminium frame with a timber infill.

Heritage Gates and Fences, a family owned and operated business, has been designing and manufacturing stylish and innovative gate and fence systems throughout the country since early to mid 90's and guarantee's that a design from any one of its five (5) ranges will enhance the appeal of your property, preserve your privacy and protect your assets whilst being the most gracious way to keep pets and children in and roaming animals out and will add eminent value to your property.

• **Hand Crafted In New Zealand** - From design through to manufacture your gates and/or fence will be handled and crafted by our full team of experienced craftsmen in our Wanganui manufacturing facilities, giving you piece of mind that your purchase will be made to the highest standard.

• **Custom Design** – Heritage Gates has been designing and manufacturing gates and fencing for many years and now with

its second generation of designers in our team, we can design and build to your specifications. Give one of our team a call on 0800 428 379 to discuss your requirements further today.

• **Nationwide Delivery** – Heritage Gates have deliveries leaving daily for destinations throughout New Zealand. Its strategic position means that transport times are kept to a minimum with standard rates from North Cape to Bluff.

Heritage Gates & Fences are proud to be the only company in New Zealand, specialising in the manufacture of Timber and Aluminium gates and fences, so for our timber range; Heritage, Country and Classic Selections call us today:

0800 428 379 or visit:

www.heritagegates.co.nz.

Enjoy your Heritage experience. Our team looks forward to working with you on your project in the near future.

Graham, James & David Cox

THE ALUMINIUM SELECTION FEATURES

- **Aluminium** – Strong & Durable yet light in weight – It can provide the strength of steel, with only one third of the weight. Aluminium also has an innate divergence to atmospheric conditions and coupled with a powder coated finish means that you will never have problems with rust.
- **Corrosion Resistant** – The metal's natural coating of aluminium oxide provides a highly effective barrier to the ravages of air, temperature, moisture and chemical attack. Its innate divergence to these atmospheric conditions means that you will never have unsightly rust.
- **Environmentally Friendly** – Once made, aluminium can be recycled over and over again using only a fraction of the energy required to make "new" metal, so aluminium is also an environmentally good choice as it is 100% recyclable.
- **Aluminium or Timber Infill** – Giving you the variable option to meet your requirements. We recommend Western Red Cedar for natural or stained finishes whilst aluminium being your optimum in either solid infill or open design gates and fences.
- **Strong Welded Construction** – All Heritage Aluminium Gate and Fences frames are completely welded using state of the art welding equipment and finished to a flush finish (no unsightly facial welds or open joints).
- **Powder Coated Finish** – The powder coated finish coupled with the natural properties of aluminium means that you will never have problems with unsightly rust. Processed through a certified plant the pre-treatment and coating system are guaranteed to give you a premium finish (see page 20 for details on the powder coating).
- **Made to measure** – Heritage Gates customised workshop has been designed to manufacture gates and fences for all applications. Gates and fences can be constructed with contoured upper or lower edges and gates come in any combination, single or double swing gates, single or double sliding gates or even as single or double sliding cantilever gates.
- **5 Year Guarantee** – Your purchase will not only be guaranteed for 5 years but you will receive a personally written guarantee, conditions apply.

THE HERITAGE ALUMINIUM SELECTION

The Hudson shown above is graced by its large Bombay stone pillars giving complete privacy. Constructed here with a black contrasting aluminium frame and cedar stained TG&V.

The Hampton gates here are enhanced by the contrasting white aluminium frame and dark stained cedar TG&V.

The Kingston, as shown above, is constructed with vertical aluminium TG&V and powder coated in Ironsand.

The contemporary design of the Charleston with horizontal TG&V is shown here with an anti-graffiti coating for ultimate protection against vandals.

Hudson (Cedar TG & V)

Hampton (Cedar TG & V)

Kingston (Aluminium TG & V)

Charleston (Aluminium TG & V)

Kentucky (Aluminium TG & V)

THE HERITAGE ALUMINIUM SELECTION

Oregon

The Oregon design is big and bold and set to make a statement. Here it is enriched by its large stone pillars.

Detroit

The Huntington design gives privacy whilst still having an "open louver" and is ideal for deflecting the wind in high wind zones. Note the Huntington below has a contoured bottom rail to suit the gradient across the driveway.

Huntington

The Huntington with contoured bottom rail and finished in Silver Pearl.

Houston

The Houston has an elegant spaced aluminium slat design that compliments any home. Shown here with a step top rail and a contoured bottom rail.

Knoxville

THE HERITAGE ALUMINIUM SELECTION

The Staten design above is finished in Off-White and paired with a contrasting block wall. This gate is complete with an audio intercom system.

This pair of Rockland pedestrian gates are fitted between pillars and latched using a ring latch.

This pair of Phoenix gates have been finished in "Gravel", note the aluminium TG & V.

The Denver provides the perfect entrance to any property. Shown here as a single sliding gate and pedestrian gate, complete with automation.

Staten

Rockland

Virginia

Phoenix

Denver

THE HERITAGE ALUMINIUM SELECTION

Trenton

The Trenton design will suit most settings. Shown here with timber posts and picket fencing.

Nashville

The clean simple lines of the Nashville give it a very impressive finish for the modern or traditional home.

Kansas

The Kansas is a solid looking design but lightweight when constructed in aluminium. Fabricated with 100mm TG&V at the bottom and 38x25mm vertical battens at the top, finished with feature pillars either side.

Madison

The Madison design has an elegant flow that reflects style and class. It's robust frame makes it sturdy and durable for a lifetime. Finished here with matching side panels and feature posts completing the look of this entranceway.

Our popular timber designs now available in aluminium...

THE HERITAGE ALUMINIUM SELECTION

The elegant Columbus has been most popular for decades. Here shown as a sliding option and finished in a dark colour complementing the house behind.

Columbus

The Portland, shown here, gives a warm drawing effect with it's sweeping top rail.

Portland

The Richmond has a simple but elegant appeal, ideal for this driveway setting.

Richmond

The Memphis shown here is ideal for the rural property. For that extra touch on your traditional farm gate.

Memphis

THE HERITAGE ALUMINIUM SELECTION

Nevada

The Nevada, shown with matching side panels, encloses this property, protecting both children & pets alike.

Montana

The sweeping mid-rail of the Montana blends in nicely with the arches on the bungalow.

Orlando

The Minnesota in these images create a formal entrance and are supported by large posts.

Minnesota

This pair of Florida gates create a warm welcoming effect with the curving top rails, Note the mid-rail has been raised in this instance.

Florida

Alabama

THE HERITAGE ALUMINIUM SELECTION

The Pittsburgh's combination straight and curved top rails give a central focus and appeal to this driveway entrance, along with the feel of elegance.

The Arizona creates a statement of this property being set between brick pillars. Note the second top rail has been removed in this setting.

The Arizona double driveway gate gives an inviting welcome to this entrance. The middle cluster detailing adds a unique touch to this classic design. Note, the 2nd top rail is missing.

The Atlanta gateway makes the perfect entrance for this new driveway. Complimented by the natural stone pillars, either side, it reflects both style and position.

Pittsburgh

Dallas

Arizona

Atlanta

Nebraska

THE HERITAGE ALUMINIUM SELECTION

Michigan

With its double curved top rail and detailed cluster middle, the Michigan is a stand out when it comes to sophistication and flair.

Dakota

This set of Dakota double swing gates complete the formal entrance to this lifestyle property.

Carolina

The curved top rail of the Carolina is enhanced by the lower circular pattern. Note the in-ground automatic gate openers.

Rochester

The placement and colour of the Carolina in this setting gives a feeling of grandeur and style. It is well matched with the strength of the gate posts, and features automatic gate openers.

Omaha

THE HERITAGE ALUMINIUM SELECTION

The contemporary design of the Seattle is shown here with a custom designed sloping bottom rail with solid infill.

The Wisconsin in this setting has been used as pool compliant fencing. Note the gate has an enhanced curve to the top rails

The Georgia design is shown above and below. Note how the spear tops, as well as adding character, enhance the security of your property.

The Georgia design pedestrian gate shown here with non standard arch top fence panels completes the fence of this solid brick bungalow

Miami

Panama

THE HERITAGE ALUMINIUM SELECTION

Cleveland

With the Cleveland, the TG&V bottom, and open top with spears provides a welcoming entrance but still keeps children and animals safe.

Indiana

The scrolling top rail and the detail of the spear tops on the Tennessee design creates a formal appearance to this entrance way.

Tennessee

With the top rail curving down to the centre on the Louisville design it creates a warm, drawing appeal to any property.

Louisville

This set of Chicago gates are set to give an automated entry to this stud farm, note the articulating arm swing gate openers.

H5 Treated Posts - Kiln dried, Laminated, dressed, sanded & radiused

ex 200x200

ex 150x150

ex 125x125

ex 100x100

Why is a LAMINATED POST better than a solid timber post?

- H5 CCA POSTS ARE TREATED PRIOR TO MANUFACTURING
This gives better treatment penetration as the timber dimensions are smaller.
- STRONGER THAN SOLID TIMBER
Laminating gives added consistent strength.
- STABLE
Laminated posts do not warp or twist.
- MANUFACTURED TO STRUCTURAL STANDARDS

Feature Posts & Pillars

Brooklyn Post

Manhattan Post

Stamford Pillar

Mapleton Pillar

Articulating Arm swing gate openers are designed for open swing gates installed on large pillars where the distance between the hinge and the edge of the pillar is considerable.

Electro mechanical swing gate openers are designed in various versions for easy and functional use anywhere from residential dwelling's, apartment blocks through to commercial applications.

Sliding gate openers are available in many configurations, from light weight residential applications through to heavy duty industrial applications. As the gear on the actuator turns it meshes with the drive rack on the back of the gate to propel it back and forth.

Hydraulic gate openers are specially designed for heavy duty applications such as where constant opening and closing is required.

In-ground openers are used where aesthetics are high priority and where other gate openers are not suited. With the actuator mounted in an in-ground enclosure it is barely visible to see what opens and closes your gate.

Access Controls & Safety Devices

Access, security and safety are always foremost in a home owners mind. With simplistic options from remote control access through to complete integration with your home automation system we can offer you the necessary devices that will suit your needs.

HERITAGE POWDER COATING OPTIONS

For further colours contact Heritage Gates.
0800 428 379

All care has been taken to ensure colour swatches are an accurate representation of the final product as far as the printing process will allow. However Heritage Gates will assume no responsibility for inaccuracy due to variations dictated by the printing process itself. For best colour matching come and see our showroom samples or CALL 0800 428 379 FOR A COLOUR CHART.

POWDER COATING PROCESS

The powder coating process starts with the metal components being cleaned, which helps the coating to adhere to the metal. This process is carried out in a multi stage immersion water tank system as follows;

- A de-greaser and light etch is used to clean the metal after which a two bath rinse cleans it down.
- Next a chromate bonder is applied to help the powder adhere to the aluminium.
- Finally a drying oven is used to ensure no moisture is present when the items are powder coated.

The components are then suspended from a gantry and passed through a spray booth where the powder is applied by electro-static spray guns. Once the powder has been applied it then goes through a curing oven where the particles melt and fuse together and adhere to the components surface.

This produces a uniform, smooth, durable finish.

MAINTENANCE & WARRANTY

We guarantee that all our products are manufactured from quality materials and with quality workmanship, and that they are free from defects which would render them unsuitable for the purpose for which they were manufactured.

Subject to the conditions of Warranty set out under section 2.2 of the Seller's Warranty the Seller warrants that if any defects in any workmanship of the Seller becomes apparent and is reported within five (5) years of the date of invoice (time being of essence), then the Seller will either (at the Seller's sole discretion) repair the defect or remedy the workmanship.

If a gate is to be automated, the hardware must be approved by Heritage Gates in advance. This guarantee does not cover damage done to the gate by inadequate or inappropriate hardware.

This guarantee applies to the manufactured product alone and does not cover any consequential loss such as repainting or rehangings.

See: www.heritagegates.co.nz, for more on Maintenance and Warranty.
